

☺ **BLACK MILLWORK**

Black Millwork has supplied bespoke timber windows and door-sets to a delightful riverside project in Bray-on-Thames where the remit required weather resistant, low maintenance products that would enhance a timber-clad floating boathouse. The LIBERTAS floating boathouse, provides a mooring for a launch on the lower deck, with a music room and gymnasium on the upper deck. As exclusive distributors for Anderson, Black Millwork specified the Woodright Double-Hung Window and Frenchwood doors with sidelights in a pine finish, combined with the speciality arc design window, to create a truly unique and aesthetically pleasing design. With Anderson joinery, they achieved the desired aesthetic of timber with the added important benefit that the product's Perma-Shield coating protects the joinery's exterior for decades. *enq 424*
